

To Whom It May Concern:

I am submitting this brief comment to request that the FCC take into full consideration of all factors that will allow VRS users to achieve full functional equivalency. The determination of the final rate for VRS must be based on fair costs, and other considerations that are legally required.

VRS is a wonderful service that allows me and other users to make phone calls with ease, and full effort must be made to ensure that this service is on par with other telecommunications services used by Americans everyday.

Continued attention and vigilance with this matter by the FCC will make certain that the needs of deaf and hard of hearing Americans are not being ignored.

Thank you,

Christian Wojnar
A VRS User
